Watch PHP and Mysql Demo Video Here:

<https://youtu.be/YefAdA9FQDM>

Why Training with Us?

I am giving PHP and mysql training with 2 projects. One project is Mini project and 2nd project is live project in php and mysql. This project will help definitely in your job.

Certification: Yes I will provide you Certificate after successfully attending the class this will help you in job assistance. I am also helping you in help placement.

My address for Class room training: Ruchiwebsolutions,#201,Datta Sai complex ,Beside IKON hospital, Landmark: Near to Vijaya Diagnostic Centre, Dilsukhnagar, Hyderabad, call if any problem to 09347045052.

Trainer Profile:

I am **Ranjan** master degree in computer from Utah State University, USA. I am part of WebDesigntainingruchi in Hyderabad, India. I have total 13 years of experience in PHP and mysql with drupal, joomla and wordpress. I have developed 350 dynamic website till now on php/mysql/joomla/drupal/wp. I have 8 years of experience in Online and class room training. I already gave the training to some of the corporate company from UK, USA, Malaysia and India in PHP, mysql, javascript, html, css, Ajax, joomla and open source. I have worked with international clients based in USA, UK, Canada, Netherlands, Australia, Italy, Ireland, France etc. I have worked on many different projects - ranging from small software to complex web applications.

I have a training Institute in Hyderabad with the name “**Complete Lamp Institute**” in Dilsukhnagar, Hyderabad, AP, India. I have already given training of 5000 Students till now, and all working in MNC and Software web Development Company.

Our Teaching style: I give real time training with LIVE PROJECT IN PHP and MYSQL. Basically i am developer of 8 yrs of experience so I will try to give my best output in PHP training.

Project Training:

1) Mini project: Below are features of mini-Project in php and mysql. This is developed in OOPS as well. As soon as I will start this project, parallel I will assign one assignment project to you so that you will be coding coding on your mini project.

Features of Mini-project: first of all we are creating one database and create register table.

- Registration: creating one registration form using html, filling the form, connecting with database, sending the form value to database.
- Login: we are going to login. Checking login page value dynamically.
- **Create Profile:** Fetching the value from database. Fetching the dynamic image and files into page
- File upload and images upload concept
- **Edit your profile:** We can change our value
- **Forgot password** : if you forgot pass then you have to enter your email id
- **Remember password:**

- **Session and cookie implementation**
- **Upload the image in database** who to fetch image from database
- **File upload:** uploading the file and fetching the files . word doc, notepad, PDF
- **Sending email** by PHP like quick contact form
- **Viewing others profile**
- **Search profile:** Quick search
- (search by First name , search by last name or search by email id)
- Delete profile
- Logout

2) Live project php and mysql: shopping cart project training -I will explain each and every line of code in this project with database, admin panel and user section. I will explain below points. Name of the project is : <http://printlandpublishers.com/> I am going to explain same project and I will teach with real coding of this project.

- Flow of project / requirement analysis
- how to create database and tables
- explaining the each files of admin panel
 - * Add/edit/delete of category
 - * Add/edit/delete of Products
 - * Order Management.
 - * PayPal management.
 - * Login of admin
 - * change password
 - * Logout
- Explaining the each files of front end
- explaining the PayPal payment gateways

Analysis of your requirement

Creating the flow of project

Database design

Administrator panel: all data of front end will be controlled by admin

Paypal payment gateway

Front end
